2026 No Animal Testing Requirement by Manufacturer

Animal Testing is defined by Vegan Action as the use of animals (live or deceased) for any type of research purposes whatsoever to include environmental safety, feed or nutrition trials, toxicity testing, or animal tests or trials "as required by law" including contracted testing by another company, since the year 2009 and no intention to test on animals in the future.

- We require a clear statement of no animal testing after the year 2009.

- We require a clear statement of no contracted animal testing after the year 2009.

- We require a clear statement of no intention to test in the future.

This must be confirmed for individual ingredients as well as ingredient components if applicable.

A no animal testing claim document is required for each ingredient.

- We do not accept certification documents from other organizations.
